University of Sfax TUNISIA | ISGI sfax | LASEM | RESDA | CES lab Computer & Embedded Systems | SCALEX INNOVATION

RAISE 2026 · ROS2 & ROBOTICS SIMULATION SCHOOL

RAISE 2026

2nd Workshop on Robotics & Artificial Intelligence in Systems Engineering

14–16 July 2026 | **ISGI – Sfax Tunisia**

Honorary Chairs

Prof. Hatem Bentaher (ISGIS / LASEM)
Prof. Mohamed Abid (ENIS / CES)

General Chairs

Houssam Chouikhi (ISSIG / LASEM)
Omar Cheikhrouhou (ENETCOM / CES)

Guest speakers

Prof. Anis Koubaa (Alfaisal University, KSA)
Prof. Souhail Dhouib (ISGIS)
Prof. Adel Alimi (ENIS)

Organizing committee

Prof. Mouna Baklouti (ENIS / CES)
Atidel Ghorbel (ENIS / LASEM)
Amira Echtioui (ENSTAB / ATMS)
Nidhal Ayadi (Basil Shine Farm / RESDA)
Olfa Gaddour (ENIS / CES)
Zeineb Boumallessa (ENIT / LASEM)
Manel Hentati (ENETCOM / CES)
Seif Hadrich (BlueBox Lab / RESDA)
Yassine Aydi (ISAMS/ CES)
Rania Ben Amor (RESDA / LASEM)
Bassem Hadjkacem (FSTSB/ CES)
Emna Kamoun (GEOMODELE/FSS)

THEME

Agentic Robotics & VLA Models for Smart Agriculture

“ RAISE 2025 ended at *diagnosis* — robots could detect a sick plant. **RAISE 2026 closes the loop:** robots that **decide what to do** and **physically act** on the field, powered by two of the strongest 2026 AI trends.

High-level brain — Agentic LLM

Mission planning, task decomposition, tool-calling, re-planning on failure. Built with Claude / GPT and the Model Context Protocol (MCP).

Low-level brain — Vision-Language-Action (VLA)

Language-conditioned manipulation learned from demonstrations. Built on OpenVLA, π0, SmolVLA — accessed via API.

WORKSHOP PROGRAM HIGHLIGHTS

DAY 1
Agentic Robotics: Making the Robot Think

Goal: an LLM-driven robot autonomously inspects the greenhouse and produces a structured field report.

DAY 2
Vision-Language-Action: Making the Robot Act

Goal: the robot executes natural-language manipulation instructions via a hosted VLA endpoint.

DAY 3
Integration & Hackathon COMPETITION

Goal: combine the planner (Day 1) and executor (Day 2) into one end-to-end agentic system. Compete.

NETWORK Connect with experts and researchers
INNOVATE Explore the latest AI & robotics trends
IMPACT Advance sustainable smart agriculture
COMPETE Participate in the hackathon challenge
COLLABORATE Build partnerships for the future

AgriRobot Platform
